Preparing the unit:

Start-up:

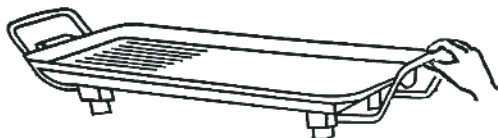

Note:

Before using the unit for the first time, carefully clean the unit and cover. Do not use any aggressive detergents, brushes with metal or nylon bristles or sharp objects such as knives or spatulas for cleaning the unit. Avoid damaging the non-stick coating. Always dry the unit thoroughly after cleaning it.

1. Connecting the unit:

1. Connect the temperature regulator to the base of the basic unit. Make sure that the plug is connected properly.
- 2 Set the temperature selector switch to heat level "0".
3. Connect the plug to a 220-240 V 50 / 60 Hz fuse socket

ATTENTION:

Do not use a multiple cables or extension cables

Preparing foods:

1. Brush the heating plate with a little cooking oil.
2. Set the temperature regulator to the required heat level.
The control lamp will light up to signal that the unit is ready for use (ON).

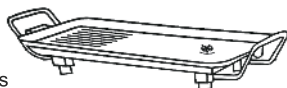

Heating levels	TemperatureC°	Food type
1 & 2	100-150 C°	Roasted food, meat, etc.
3 & 4	150-200 C°	Pancakes, scrambled eggs, bacon, etc.
5	About 240 C°	Grilled meat etc.
Thermostat		Warming function

It takes 5-10 minutes after the unit is switched on before the control lamp goes out. You can then start cooking the food.

Once cooking is complete, the unit can be kept warm. To do this, set the temperature regulator to the thermostat level.

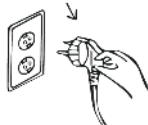

Note:

1. Please be careful when using the aluminium plate hot, hands can not touch the baking tray
- 2.. Please do not use close to the oil splash hurt hands, head close to the eye injury
3. The whole baking tray cannot be put into the dishwasher.

After use:

Set the temperature regulator to the 0 level and pull the plug out of the mains socket! Allow the unit to cool down thoroughly before cleaning it.
